

Monika Høy

React Native Developer

About me

I'm Monika, originally from Denmark, but now based in Berlin. I've worked with React Native since 2021 where my love of plants resulted in a plant journal app. Shortly thereafter I got the unique opportunity to intern at an educational app, where I am now a mobile developer. I have a background in social science and localisation that I use to bring the user to the center, and to ensure clear and joyful communication with my coworkers.

Experience

Equalista GmbH

Mobile Developer

Jan 2022 - present · Berlin

Responsible for builds, releases, developing new features and maintaining existing code
